EQUIPMENT DESIGNER AND MANUFACTURER FOR ROADS CONSTRUCTION AND MAINTENANCE

ACMAR has developed around its equipment a complete range of departments to insure the smooth running and the maintenance of your equipment. Our objective is to allow you an optimal use of your machines.

- **Assistance / Hotline :**
Need for additional information or a breakdown on your equipment? without hesitation contact our customer service. Our technicians are at your disposal to proceed with the diagnosis and facilitate your control of your machine.
- **Troubleshooting :**
In case of problems, our after sale service ensures the repair of your machine in the shortest possible time. We offer replacement vehicles if more extensive interventions are required (subject to availability).
- **Technical watch :**
Our field technicians visit you to meet your needs and listen to you.
- **Startup :**
In France or abroad, our technicians ensure the commissioning of your new machine and train your teams on site.
- **Maintenance / Service :**
Late in the season, our after sales service receives your equipment to perform the service and required maintenance.
- **Spare parts supply :**
Our store, with its dynamic and reactive team, ensures the provision as soon as possible of the spare parts you need.
- **Training :**
We offer various training courses suited to your needs to ensure better control of ACMAR equipment. Training is provided by our technicians and can be organized in our office or at your place in several languages.
